

Mikael Weiss

Mobile & Frontend Software Engineer • Swift, React, TypeScript

307-226-5183 mikael.weiss@weissolutions.org [linkedin:mikael-weiss](https://www.linkedin.com/in/mikael-weiss) [github:MikaelWeiss](https://github.com/MikaelWeiss)

SUMMARY

Software engineer with five years shipping production apps across mobile, desktop, and web, including cross-platform work in React and TypeScript. I build interactive UI from designer mocks, integrate backend APIs, and ship to real users. I work closely with designers and backend engineers, lead small teams, and use AI tooling (Claude Code, Codex, Cursor, Pi.dev) every day to build full-stack applications front to back.

EXPERIENCE

Founder & Lead Developer

Jul 2024 - Present

[Weiss Solutions LLC](#)

- Ship cross-platform products in React 19, TypeScript, and Tauri, including Open Chat, a multi-provider AI chat client
- Build interactive UI and wire AI features (multi-model chat, prompts) directly into the frontend
- Deliver frontend and full-stack contract work on fast release cycles; shipped Strive Planner (2,000+ downloads, 5-star rating) and its companion web app

Frontend Engineer (Contract)

Jan 2026 - Apr 2026

[AskElephant \(Remote\)](#)

- Built customer-facing web UIs (whattheflux.ai, Peanut by AskElephant) in React + TypeScript against a GraphQL API
- Developed a shared React component library reused across Peanut by AskElephant and the Electron desktop product; built onboarding, settings, and real-time transcription UI
- Shipped the Flux and Peanut AI dictation apps: React 19, TypeScript, Vite, Radix UI + Tailwind design system, with Vitest test coverage; authored and integrated an npm package

CTO / Lead Developer

Feb 2025 - Oct 2025

[OpSync Services \(Remote\)](#)

- First engineer and technical lead; grew and led a team of a web developer and a mobile intern
- Architected the product across a React frontend, FastAPI backend, and Supabase PostgreSQL database, integrating real-time OpenAI voice with sub-second latency
- Established CI/CD pipelines shipping 1-2 releases weekly; introduced agentic development workflows

Software Engineer

Jan 2025 - Apr 2025

[FamilySearch](#)

- Fixed 100+ WCAG accessibility issues across a product serving thousands of daily users
- Modernized 10,000+ lines of code to async/await, fixing 100+ concurrency-related bugs

Software / App Developer (Contract)

2020 - 2025

[Bryce Labs](#), [High Country Living](#), [Elements Financial](#), [Pastimes](#)

- Built greenfield products from designer mocks; promoted from intern to contractor at Elements Financial

SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, TailwindCSS, Vite, Radix, accessible (WCAG) UI

Mobile & Languages: Swift, SwiftUI, UIKit, SwiftData, Elixir/Phoenix, Python/FastAPI, Rust

APIs, Tools & AI: GraphQL, REST, Supabase, Firebase, Vitest, Git, CI/CD, OpenAI APIs, agentic tooling (Claude Code), team leadership, Spanish

EDUCATION & LEADERSHIP

B.S. Computer Science

Jan 2024 - Jul 2027

[Brigham Young University - Idaho](#)

3.9 GPA • President, Mobile Computing Society • VP, Computing Society

Volunteer Service (Spanish-speaking)

Oct 2021 - Oct 2023

Led and trained teams of 10-20 volunteers; developed the goal-setting systems later built into Strive Planner
