

Mikael Weiss

Native iOS Engineer & Entrepreneur

307-226-5183 mikael.weiss@weissolutions.org [linkedin:mikael-weiss](https://www.linkedin.com/in/mikael-weiss) [github:MikaelWeiss](https://github.com/MikaelWeiss)

SUMMARY

Native iOS engineer with 6+ years shipping production apps on iOS, plus web, Android, desktop, and Linux. I build interactive software and resilient architecture, and I run agentic engineering workflows that produce predictable, high-quality code across the full development lifecycle. These systems increase developer autonomy and systems view.

EXPERIENCE

Founder & Lead Developer

Jul 2024 - Present

[Weiss Solutions LLC](#)

- Shipped "Strive Planner" full-stack app including calendar goal setting app with collaborative cross user real-time sync
- Architected a software development lifecycle with predictability, quality, and speed that has scaled quite wonderfully
- Shipped mobile and desktop application "Open Chat"; shipped desktop app "Timbre" and desktop app "Splash Screen"
- Shipped open source agentic orchestration system and workflow builder "Penguin" as a cross-platform desktop app

Software / App Developer (Contract)

2020 - 2026

[Bryce Labs](#), [High Country Living](#), [Elements Financial](#), [Pastimes](#)

- Built greenfield products from client descriptions and provided mock-ups; developed and release of 5+ apps

Software Engineer

Jan 2025 - Apr 2025

[FamilySearch](#)

- Fixed 100+ WCAG accessibility issues across an iOS application serving thousands of daily users across the globe
- Modernized 5,000+ lines of code to async/await, resolving many concurrency-related bugs and simplifying the codebase

CTO / Lead Developer

Feb 2025 - Oct 2025

[OpSync Services](#)

- First engineer and technical lead; grew and led a team of a web developer and a mobile intern; full-stack software
- Built agentic engineering systems that let a mobile intern ship production iOS features while still learning development
- Architected the software across React web frontend, FastAPI backend, Supabase database, and multiple AI integrations

Software Engineer (Contract)

Jan 2026 - Apr 2026

[AskElephant](#)

- Developed shared npm library for dictation used between multiple AskElephant products with snippet and audio pipelines
- Shipped Flux and Peanut dictation apps: React, TypeScript, Tailwind, Shadcn frontend, and OpenAI speech-to-text API
- Refactored a 6,000-line TypeScript file into a properly structured Electron app following common conventions

SKILLS

Frontend: Swift, SwiftUI, UIKit, React, HTML, CSS, WCAG accessibility, Electron, Phoenix

Languages: Swift, TypeScript, Erlang, Elixir, Python, Rust, Shell

Leadership: Technical Architecture, Team Management, Code Reviews, Mentoring, Process Implementation

EDUCATION & LEADERSHIP

B.S. Computer Science

Jan 2024 - Jul 2026

[Brigham Young University - Idaho](#)

3.9 GPA • President, Mobile Computing Society • VP, Computing Society

Volunteer Service (Spanish-speaking)

Oct 2021 - Oct 2023

Led and trained teams of 10-20 volunteers; developed the goal-setting systems later built into Strive Planner
