

Mikael Weiss

Full-Stack Software Engineer • Frontend, Backend, Linux

307-226-5183 mikael.weiss@weissolutions.org [linkedin:mikael-weiss](https://www.linkedin.com/in/mikael-weiss) [github:MikaelWeiss](https://github.com/MikaelWeiss)

SUMMARY

Software engineer with five years shipping production systems across mobile, desktop, web, and Linux. I make interactive systems that span the development flow from services hosted on Linux, to frontend web, mobile, and desktop applications. I build using an extensive array of agentic engineering tools including Claude Code, Cursor, Codex, and Pi.dev. I orchestrate agent systems that produce predictable, high-quality outputs regardless of the coding harness used. These systems include a curated set of skills, hooks, mcps, and plugins that facilitate the AI.

EXPERIENCE

Founder & Lead Developer

Jul 2024 - Present

[Weiss Solutions LLC](#)

- Shipped "Strive Planner" full-stack service including calendar tracking, planning/goal-setting, and reflection systems
- Architected a software development lifecycle with predicatibility, quality, and speed with a carefull selection of AI tooling
- Delivered a refined user experience with attention to detail and focus on the user; Shipped Strive Planner an iOS and macOS app, Phoenix and Elixir backend, web app, and Android coming soon; full real-time sync across all platforms
- Shipped mobile and desktop application "Open Chat"; shipped desktop app "Timbre" and desktop app "Splash Screen"

Software Engineer (Contract)

Jan 2026 - Apr 2026

[AskElephant \(Remote\)](#)

- Developed shared npm library for dictation used between multiple AskElephant products with snippet and audio pipelines
- Shipped Flux and Peanut dictation apps: React, TypeScript, Tailwind, Shadcn frontend, and OpenAI speech-to-text API
- Refactored 6,000 line TypeScript file into a properly structured Electron app following common conventions and structure

CTO / Lead Developer

Feb 2025 - Oct 2025

[OpSync Services \(Remote\)](#)

- First engineer and technical lead; grew and led a team of a web developer and a mobile intern; full-stack software
- Curated agentic engineering systems that led to production-ready software across the software development lifecycle
- Architected the software across React web frontend, FastAPI backend, Supabase database, and multiple AI integrations

Software Engineer

Jan 2025 - Apr 2025

[FamilySearch](#)

- Fixed 100+ WCAG accessibility issues across a product serving thousands of daily users
- Modernized 10,000+ lines of code to async/await, fixing 100+ concurrency-related bugs

Software / App Developer (Contract)

2020 - 2025

[Bryce Labs](#), [High Country Living](#), [Elements Financial](#), [Pastimes](#)

- Built Greenfield products from client descriptions and provided mock-ups; developed and release of 5+ apps

SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, TailwindCSS, Vite, accessible (WCAG) compliance, Electron, Phoenix

Software Languages: Swift, Elixir/Phoenix, Python/FastAPI, Rust, Linux, Bash, ZSH, Systemd, automation, rsync, restic

Hardware & AI: Raspberry Pi, Soldering, AI Skills, Coding Harnesses, MCP, ACP, multi-agent orchestration, simplicity

EDUCATION & LEADERSHIP

B.S. Computer Science

Jan 2024 - Jul 2027

[Brigham Young University - Idaho](#)

3.9 GPA • President, Mobile Computing Society • VP, Computing Society

Volunteer Service (Spanish-speaking)

Oct 2021 - Oct 2023

Led and trained teams of 10-20 volunteers; developed the goal-setting systems later built into Strive Planner
